

2017 Regional Fair Scientific Review Committee Roster

Intel ISEF, and therefore CSEF, requires all fairs to appoint a Scientific Review Committee (SRC) of at least three people. The SRC must include at least one biomedical scientist (Ph.D., MD, DVM, DDS, or DO) and one educator. One member must be familiar with proper animal care procedures when animal research is involved. The SRC must review and approve projects involving restricted areas of research before experimentation is started, and must review the research plans of each exhibit after experimentation and prior to the Regional Fair to make sure students have followed the rules. **Please complete the form below and return to:**
